

# Intradistrict Communication

DATE: Thursday, September 6, 2018

TO: All Principals

FROM: Dr. Anthony Godfrey, Associate Superintendent  
Ben Jameson, Director of Evaluation, Research and Accountability 

SUBJECT: 2018 SAGE Data Release on USBE Data Gateway

---

Beginning September 5, 2018, the 2017-18 SAGE proficiency and growth results were released on USBE's Data Gateway for principals, schools, and districts to review. Originally, USBE intended to release this data to the general public on September 13<sup>th</sup>; however, due to a glitch in the Data Gateway system, the 2018 SAGE data was made available to the public as of this morning. The URL for the Data Gateway is <https://datagateway.schools.utah.gov/>. The login prompt is in the upper right hand corner of the screen.

SAGE science grades 6-8 data are not yet released on the Data Gateway pending ratification from the USBE. We expect this data to be released in mid-October.

We ask that principals log into the Data Gateway and review their school's SAGE results so as to become familiar with what parents and other stakeholders can view and thus be able to answer their questions.

It is anticipated that USBE will release accountability data and school report cards in late November for principals, schools and districts to review. While the release date is still tentative, schools will likely have an opportunity to review their accountability data prior to public release.

If you need assistance navigating the Data Gateway or logging in, please contact Ben Jameson at 801-567-8243.
