

# Intradistrict Communication

DATE: Thursday, July 28, 2022

TO: All School Administrators

FROM: Carolyn Gough, Administrator of Teaching & Learning  
Ben Jameson, Director of Evaluation, Research and Accountability

SUBJECT: English Learner Student Profile Dashboards

---

The English Learner Student Profiles dashboards have now been updated with 2022 WIDA Access, Acadience Reading, Acadience Math, RISE, Utah Aspire Plus, and ACT data.

This dashboard is unique in that it offers an assessment profile of all existing assessment data for individual EL students. For a single EL student, the student profile dashboard will allow school administrators to see the assessment history for any EL student that has a WIDA Access score.

The English Learner Student Profile dashboards may be used to help determine EL plans, target students for specific interventions and support, or provide relevant assessment data as part of student support team discussions around specific EL students.

For elementary EL students, school administrators can see current and historical assessment data for the WIDA Access, Acadience Reading, Acadience Math and RISE.

For middle school EL students, school administrators can see current and historical assessment data for the WIDA Access, Acadience Reading, and RISE.

For high school EL students, school administrators can see current and historical assessment data for the WIDA Access, Utah Aspire Plus, the 11<sup>th</sup> grade administration of the ACT, attendance, and course grades.

School administrators may access the English Learner Student Profile dashboards [here](#).

For questions about the student profile dashboards, please contact Brooke Anderson or Ben Jameson in Evaluation, Research & Accountability.
