SUBJECT: 2023 BOY Acadience Reading Dashboards in Tableau

Beginning of the year Acadience Reading data and results are available in Tableau Viewer accounts. Administrators may view aggregate student participation, benchmark proficiency, and measure proficiency by school and grade level over time (2015-present). In addition, school administrators may view individual student and teacher data for the fall of 2023. New this year is a dashboard that will allow viewers to look up students' historical Acadience Reading benchmark, pathways of progress and individual measure performance. Demographic filters are also available to help school administrators drill down to the data they wish to see.

All of this information may be found in one dashboard location:
