

Tactical Emergency Casualty Care (TECC)

Why is this training needed? During and immediately after every mass-trauma event the civilian population regularly brings up two items:

- 1 - Those that want to help don't have the training to help.
- 2 - Those that have the training to help don't have the equipment to help.

Class Agenda

Until Help Arrives:

- You Make a Difference
 - Steps you can take when responding to a life-threatening situation
 - Different reactions you may have in a stressful situation
 - Importance of practice and rehearsal to improve your response to a life-threatening situation

Stop the bleeding:

- Recognize life-threatening bleeding
- Steps to control bleeding
 - Apply steady pressure
 - Tourniquets
 - Chest seals
 - Wound packing
