## The Dignity Index

### AN EIGHT-POINT SCALE THAT SCORES SPEECH ON ITS POWER TO UNITE OR DIVIDE

The Dignity Index is a new project of the national nonprofit UNITE, whose mission is to help heal the political and cultural divides in our communities and our country. The Index is an eight-point scale that measures the level of contempt or dignity in public language. The Dignity Index was pilot-tested in Utah using political speech during the 2022 federal races and the results of the pilot revealed the power of the Index to promote problem-solving in broad settings, including community and educational settings.
