Earn as you Learn

- Earn $100 for completing the Big Six course
- Earn $350 for earning certification and implementing Big Six in class with DTL Specialist
- Earn $150 for leading a school tech training

Big Six Certification Program

Digital Teaching and Learning wants to help your teachers become Big Six certified this year. Nominate **ONE** teacher (preferably someone where technology is an area of growth) to participate this year. Our program includes stipends as teachers complete various steps in working with Big Six tools in their classrooms. As they complete each step, in order, your teacher will receive that stipend.

Step 1-Complete the Big Six Certification Course

Our Big Six Certification Course provides teachers with an overview of each tool and helps participants demonstrate classroom application for each. Teachers must complete all assignments and submit them in Canvas to qualify for the stipend ($100). This seven-week course begins on Oct. 6, 2025.

Step 2-Earn a Certification for One Big Six Tool

Starting in Jan. 2026, complete the JSD technology course for one of the Big Six tools and pass the certification requirement for that tool. Connect with your Digital Learning Specialist to develop a tech-enhanced lesson using an activity with the digital tool from your course. These lessons should be reviewed by the specialist and submitted in Canvas along with a reflection about your teaching experience ($350).

Step 3- Share Your Learning in a Tech PD Training

The final step in your technology journey involves teaching your colleagues in a PD in-service. Share your technology knowledge by leading a Tech Training in your building about the skill(s) you developed this year. Work with your Digital/Instructional Coach to coordinate your presentation and submit your assignment/reflection in Canvas ($150).
