

Chromebook Kiosk for Lunch Payments in the Main Office

Are you looking to streamline lunch payments for parents and guardians that want to make a payment in the main office? Consider implementing a Chromebook kiosk! This option will allow families to conveniently make food service payments directly through their Skyward Family Access account, reducing the need for office and cafeteria staff to handle these transactions directly.

There is no need to purchase a new Chromebook, simply contact your school tech to configure an existing device to operate in kiosk mode for a secure and user-friendly experience.

To assist families with making payments, the tech can provide a link to these tutorials on the Chromebook.
