

Intradistrict Communication

DATE: Thursday, February 10, 2022

TO: All School Administrators

FROM: Carolyn Gough, Administrator of Teaching & Learning
Ben Jameson, Director of Evaluation, Research and Accountability

SUBJECT: Demographics Dashboard Updated with Oct. 1, 2021 Enrollment

The Demographics Dashboard in Tableau has been updated with Oct. 1, 2021 enrollment data. The dashboard will show district and school demographic trends from 2016-2021 Oct. 1st enrollment by race/ethnicity, gender, economically disadvantaged status, EL status, and student with a disability status. School administrators may access this dashboard [here](#).

For the district's population, school administrators will note some significant shifts in demographics that will also apply to some school populations:

- 8.1% increase in minority students with the largest increases with the following two student groups:
 - 9.6% increase in Hispanic students
 - 11.8% increase in Pacific Islander students
- 25.6% decrease in economically disadvantaged students (with free lunch being served to all students, there is no need for families to apply for free/reduced lunch; hence, the decrease in students being identified as economically disadvantaged)
- 13.5% increase in EL students (454 more EL students for 2021-22 than the prior year with many more having been identified for services since Oct. 1, 2021)
- 6% increase in students with a disability

Please contact Ben Jameson in Evaluation, Research & Accountability with any questions about the Demographic Dashboard.
