K-2 Can Google Too!

New Course Offering for

K-2 Teachers

K-2 Can Google Too!

You know what you can do with G Suite for Education and what students in grades 3-6 can do. What about our little learners. G Suite for Education is for them too. In this course we will learn that even students in grades K-2 can use the features of Google Classroom, Docs, Slides, Forms, and Drawing. Google Classroom is an easy file management system that students can easily access and teachers can place assignments.

Each module will have a brief review of the Google App and then we will focus on how you can use these tools with our littlest learners. Creating interactive drawings, interactive math manipulatives, interactive posters, etc. It just takes a little creativity, time and patience to move these little learners into the digital age.

1 USBE Credit or Relicensure Credit available

Class Dates: September 5, 12, 19, and 26

Class Time: 4:30 - 6:30

Location: Computer Lab at the Auxiliary Services Building, 7905 South Redwood Road
