

Intradistrict Communication

DATE: Thursday, February 20, 2020

TO: Elementary Principals

FROM: Shelley Nordick, Ph.D., Administrator of Teaching and Learning
Ben Jameson, Director of Evaluation, Research and Accountability

SUBJECT: MOY Acadience Reading Dashboards

A new series of dashboards containing an analysis of district and school BOY and MOY Acadience Reading data have been released to elementary school administrator Tableau Viewer accounts. These dashboards may be found at the following location in your Tableau Viewer account:

Explore > 2020 BOY and MOY Acadience Reading Analysis > **2020 Acadience Reading MOY Analysis**

This dashboard contains data related to proficiency and growth for both the BOY and MOY benchmark periods at the school and district levels. In addition, school administrators may view data by grade level measure. An achievement gap analysis is also available for the following student groups: students with a disability, economically disadvantaged, ELL, gender and race/minority.

Explore > 2020 BOY and MOY Acadience Reading Analysis > **2020 Acadience Reading Goals for District and Schools**

This dashboard contains a progress report for the district and each school on how close they are to meeting the state goals. In addition, there is a very interesting dashboard that compares district and school growth to the national average for each composite score level.

Explore > 2020 BOY and MOY Acadience Reading Analysis > [Your School's Name] – Teacher and Student Level MOY Acadience Reading Data > **Teacher and Student Level Data**

This dashboard contains BOY and MOY data by teacher and student. School administrators may filter down to teacher and class as well as student groups to see both proficiency and growth scores. Using the student group filters, school administrators may also identify students who are in need of extra time and support. In addition, school administrators may view a proficiency movement dashboard (similar to the Correlation Report on Amplify).

Please contact Ben Jameson in the Evaluation, Research & Accountability Department with any questions about these dashboards or if you would like to schedule a time to explore your data together.
