

Mental Health Access Program (MHAP)

For the 2020-21 school year our District has received *substantial* funds to meet student's mental health needs through our Mental Health Access Program (MHAP). **We encourage schools to refer any student or family that would benefit from these services.** There is no limit for any one school and the District will be able to accommodate all needs-based referrals.

What is MHAP?

- Jordan District has contracted with 13 community mental health providers ([click here for the MHAP MAP](#)) with a variety of expertise. Each family referred has many options to determine what best meets their family's mental health needs.
- The first \$800 for each family referred is covered by a grant regardless of their insurance or financial status.
- Families referred are able to begin services within 10 days!
- Families can receive individual therapy, family therapy, medication evaluations (for students who might be in need of mental health medications) and medication follow up visits through MHAP.
- Any student is eligible based on school referrals, regardless of their circumstances, though MHAP is meant for students who otherwise would not be able to access mental health services.

How do I refer a student/family to MHAP?

Talk with your school team, fill out [this brief referral form](#), and send it to a member of the health and wellness team. We will follow up promptly!

If you have any questions contact a member of the Health and Wellness Team:
Kevin Mossel, 385-249-7932, kevin.mossel@jordandistrict.org,
McKinley Withers, 801-567-8245, mckinley.withers@jordandistrict.org

Please don't hesitate to make many needs-based referrals this year!
