

# Intradistrict Communication

DATE: Thursday, November 18, 2021

TO: Middle School Administrators

FROM: Shelley Nordick, Ph.D., Administrator of Teaching and Learning  
Ben Jameson, Director of Evaluation, Research and Accountability

SUBJECT: Tableau Dashboard Releases

---

The following dashboards have been released for middle school administrators:

## [RISE with Individual Teacher and Student Results:](#)

RISE data is now by individual teacher and student in addition to the proficiency data released earlier this summer. Please note, student growth was not calculated by the state for the 2020-21 school year, so this data will not be reflected on the RISE dashboard.

## [Utah Aspire Plus:](#)

School administrators may view the following data for both the district and individual schools by student demographic for both the 2019 and 2021 test administrations:

- Proficiency and scale scores for English, Reading, Math and Science subtests
- Predicted ACT scores for English, Reading, Math and Science subtests
- Reporting category scores for English, Reading, Math and Science subtests
- Student participation
- Individual student data

## [Opportunity to Learn Survey:](#)

As part of end-of-year summative testing, students who took the RISE math test or the Utah Aspire Plus science test. The survey asked several questions around the context of the type of learning environment students had access to throughout the school year (online, hybrid, in-person), the learning support they had access to at home as well as at school, and the access they had to educational technology and resources. The purpose of this survey was to provide some additional context around 2020-21 summative assessment results anticipating that learning would be affected by the COVID-19 pandemic. School administrators may view this student perception data by student demographic for the district and individual schools.

## [WIDA Access Growth Targets:](#)

WIDA Access results and proficiency were released earlier this summer. Information on WIDA growth targets has now been added for both the district and individual schools. As part of the state's school accountability system, schools receive points towards a school grade for EL students who:

- Reach proficiency on the WIDA Access
- Meet their WIDA growth target

School administrators may view data for both school report card indicators in this dashboard for each student demographic.

Please contact Ben Jameson in Evaluation, Research & Accountability for any questions about these dashboards or for access to your Tableau account.
