

Intradistrict Communication

DATE: September 24, 2026

TO: Principals and Assistant Principals

FROM: Michael Anderson, Associate Superintendent
Buddy Alger, Director of Student Services
Michelle Reyes, CARE Team Specialist

SUBJECT: Panorama Student Feedback Survey Dates, Opt-In Report & Survey Coordinator Resources

The Panorama Social-Emotional Wellness survey may only be administered to students whose parents have opted-in. Parents are asked to opt-in to the student feedback survey during the yearly school registration process. When the online registration process closes on Oct. 1 schools will need to manually enter the opt-in consent received after that date into Skyward. [Attached is a digital copy](#) of the parent opt-in consent from the online registration information.

2026-27 Panorama Survey Windows:

- **Fall- October 5, 2026-November 6, 2026**
- **Winter- January 22, 2027 – February 19, 2027**
- **Spring- April 19, 2027 – May 11, 2027**

Action for Schools

- School Panorama Survey Coordinators should print out the list of students who have opted-in and provide teachers administering the survey with the list of students in their classes that have opted-in. The student opt-in list can be accessed through Skyward using this [data mining report](#).
 - Most secondary schools use the advisory period teachers to administer the survey and post the link surveys.panoramaed.com/utahjordan in Canvas or Google Classroom
 - Most elementary schools share the link surveys.panoramaed.com/utahjordan in Canvas or Google Classroom and use grade level teachers to administer the survey

The following information is provided to inform and assist you as you administer student surveys:

- The list of students who may take the survey (opted-in) will be provided to Panorama before and at mid-window during the administration of the survey by Student Services. **Only** opted-in students will be able to log in and take the survey. If students are unable to login to take the survey, it is likely that they have not been opted-in. Teachers should refer to the list.
 - If there are students who are on the opted-in list, but are having log-in issues, the school survey coordinator should contact Panorama directly for assistance at support+utahjordan@panoramaed.com. Student Services does not have the ability to manage access to surveys.

- Survey coordinators and administrators should view the [Administering Panorama Survey](#) presentation for information, instructions, and guidance regarding the student feedback surveys.
- The updated Panorama Dashboard with your school data will be available 7 days after the survey window closes.

Questions? Contact Buddy Alger (buddy.alger@jordandistrict.org) or Michelle Reyes (michelle.reyes@jordandistrict.org) at 801-567-8183.

Dear Jordan School District Families,

As we work to ensure every student in our district thrives academically, socially, and emotionally, we invite you to opt your child in to participate in our upcoming Panorama Social-Emotional Wellness Survey.

When students feel safe, valued, and connected at school, their learning grows. This survey gives our students a direct voice, helping us understand their everyday school experiences and how we can better support them.

Why We Administer the Survey: Academic achievement goes hand-in-hand with emotional well-being. The Panorama survey gathers student feedback on essential climate as well as the Jordan District Portrait of a Graduate Characteristics.

- **Resilience & Mindset:** How connected students feel to their school community and how they navigate daily challenges, and stress.
- **Portrait of a Graduate Characteristics:** Curious Thinkers, Creative Problem Solvers, Engaged Citizens, Empathetic Communicators, Resilient Life Long Learners, and Responsible Teammates. For more information about these characteristics visit our [website](#).

How We Use the Results: Your child's feedback provides actionable insights that guide our district and school leaders. Specifically, we use the results to:

- Measure student progress in developing key real world skills, as well as track the district's overall impact in preparing graduates for success beyond K–12. Strengthen school climate initiatives and anti-bullying programs.
- Identify areas where students may need extra support.
- Shape professional development for staff on building positive classroom cultures.

Full Transparency for Families: Partnership with our families is built on transparency. We want you to feel completely comfortable with the content of the survey, and we encourage you to review the exact questions before making your decision. You can view the full survey questions at [survey grades 3-6](#), and [survey grades 7-12](#).

How to Opt In: You may have already opted in this year during your students registration completion. If you haven't completed that yet, or wish to opt in now, please complete the brief [consent form](#).

Thank you for helping us create a supportive environment where every student can succeed.
