Scrible 101: A Beginners Guide

If you have never used Scrible or are just getting started, come learn how to use this powerful platform to streamline research and celebrate writing in your class. We will get you set up, walk you through how to annotate articles online and create an assignment. We will also review how you can use Scrible to battle AI plagiarism and scaffold the writing process for students. By the end of the session, you'll be equipped with the knowledge and tools needed to begin using Scrible effectively with your students.

Scrible 102: Advanced Features

Scrible, an award winning resource, is chock full of features that can help students and teachers scaffold the research and writing process. Learn how to use some of Scrible's advanced features to strengthen students' media literacy and elevate their writing skills. We will review how to track student progress, provide timely and specific feedback, and effectively use the Scrible Writer doc add-on. By the end of this session, you will be able to deepen your usage of Scrible and introduce your students to new features.

① What Is Scrible?

Scrible provides a one-stop-shop workspace for students to curate, annotate, cite, and write. A robust data dashboard gives educators real-time classroom and student-level progress tracking analytics for assignments, enabling timely feedback and personalized instruction.

② Managing AI

Scrible enables for writing what's done in math: *show your work*.

Supports best practice by shifting assessment from the end product to the process, making it easier for students to be ethical.

Mitigates AI risk so you can focus on AI's benefits.

③ Teachers

Quick start with single sign-on and class roster sync

Create powerful research, writing, and close reading assignments

Track student progress in real time

④ Students

Annotate PDFs and online articles

Save and organize libraries of articles

Add annotated evidence to papers

Easily create outlines and bibliographies
