Teaching CTE through Literacy

No, you aren't an English teacher, but there are standards of Literacy for all technical subjects, and your students need to be literate in the content of your course.

Join us for some relevant and targeted professional development to help your students learn to read and write your subject. Participants will be guided through subject-specific reading, writing and presenting strategies to strengthen learning in your content area.

This training, part of the CTE goals this year, is highly recommended for all secondary CTE teachers. Please sign up for the course on JPLS. (#101047)

Classes are capped at 35 participants. When you have chosen your section, please promptly arrange for a substitute.

All classes will be held in ASB room 101, 7:30-10:30 a.m.

Dates available are: Wednesday, May 4 Thursday, May 5 Monday, May 9 Tuesday, May 10 Wednesday, May 11
