Intradistrict Communication

DATE: Thursday, September 22, 2022

TO: All Administrators

FROM: Carolyn Gough, Administrator of Teaching and Learning
          Ben Jameson, Director of Evaluation, Research and Accountability

SUBJECT: Updated Reports in the State's Data Gateway

_____

The state's Data Gateway contains official assessment, early college, graduation, and early learning data. Administrators must have an account that they sign into on the Data Gateway to be able to drill down in the reports to see teacher and student level data.

The Data Gateway may be accessed here: https://datagateway.schools.utah.gov/Login

Here are the reports that have been recently updated:

Compare Schools: This report, updated with 2022 RISE and Utah Aspire Plus results, compares proficiency and growth (MGP) for demographically similar schools from across the state.

Utah Aspire Plus: This report contains Utah Aspire Plus data, updated with 2022 assessment results, for districts and schools.

WIDA Access Individual Student Reports: This report allows school administrators to download 2022 WIDA Access individual student reports based on *current enrollment* for students in your building right now.

The student proficiency, student growth, ACT, and early college reports will all be updated over the next few weeks as well.

Data Gateway accounts for school administrators should already be updated based on current school assignments. However, if an administrator needs an account in the Data Gateway, or your account has been locked or deleted, please contact Ben Jameson in Evaluation, Research & Accountability.
