Intradistrict Communication

DATE: Thursday, May 4, 2023

TO: All School Administrators

FROM: Carolyn Gough, Administrator of Teaching and Learning
Ben Jameson, Director of Evaluation, Research and Accountability

SUBJECT: 2023 Raw WIDA Access Results Available in WIDA AMS

_____

The 2023 WIDA Access raw results are now available in DRC Insight. These reports are based on students who completed WIDA testing in your school this year, but they do not include students who will be enrolled in schools for the 2023-24 school year (i.e., incoming 7th and 10th graders). Many schools need these results as soon as possible so that they can finish building their ESL Study Skills classes into their master schedule. Evaluation, Research & Accountability is working to provide this information, based on your projected enrollment for the 2023-24 school year.

In the meantime, school administrators with accounts (contact JoLynn Snelgrove if you need an account at jolynn.snelgrove@jordandistrict.org) and test coordinators may access 2023 WIDA Access results for students who tested in your school using the following steps:

1. Login to DRC Insight (WIDA AMS): https://www.drcedirect.com/all/eca-portal-v2-ui/ - /login/WIDA

2. Click on the My Applications tab on the top left. Then click on Report Delivery under Scoring and Reporting:

3. Click on the Test Results tab:

4. Click on each drop-down menu so that it looks like the screenshot below (make sure your school name appears under the School drop-down menu), then click Download Reports:

Show Reports   **Download Reports**

5. Confirm your reports download by clicking on Download Reports again:

Confirm Reports Download

(?) You have requested to download reports. This will download a ZIP file containing all reports matching your selected filters. Depending on the number of reports, this may take several minutes. Are you sure?

Download Reports   **Cancel**

The report will download an Excel CSV file. Columns H and I contain the student names. Columns AY-BE contain the language proficiency level.

Validated and cleaned results will be published on Tableau viewer accounts in the next week or two. Printed individual student reports (ISRs) will be delivered to schools when they become available later in May.

Please contact JoLynn Snelgrove or Ben Jameson in Evaluation, Research & Accountability with any questions.
